Neuro-IFRAH® Organization

www.NEURO-IFRAH.org

Cost: \$2,900.00

Tuition Covers Parts I & II materials.
Full tuition due one month prior to the
starting date of each course.

Course Instructor:

**Waleed Al-Oboudi, MOT,
OTR/L** is a therapist and educator in
the field of rehabilitation nationally
and internationally for over 30 years.
He is the originator of the Neuro-
IFRAH® approach and is known for
his concepts and clinical skills in the
treatment and management of
patients affected by a stroke or brain
injury. Many of his basic to advanced
concepts are copied as he was the
mentor of a number of known
educators for many years. He is the
originator of all his intermediate to
advanced concepts and
applications. He is also the originator
of the IFRAH® concepts and
applications for patients affected by
orthopedic conditions. Mr. Al-
Oboudi's Neuro-IFRAH® approach
includes a whole system of hands on
therapy, training equipment, and
orthotics that are taught by Neuro-
IFRAH® Instructors at top facilities
and are popular and effective courses
nationally and internationally. Mr. Al-
Oboudi's concepts and clinical skills
are self evident and aim to set a
standard of excellence in
rehabilitation as they have been
continuously demonstrated in live
national conferences, courses, and
teleconferences for over 25 years.

- responsible for additional expenses incurred
- by registrants.

Assistant Instructor is available with class
sizes above 16 participants

Location:

Neuro-IFRAH® Clinic and Education Institute

1241 E. Hillsdale blvd suite 250
Foster City, CA 94404
(San Francisco Area)
The Institute is 20-30 minutes from
the San Francisco airport

Participant Requirements:

Licensed Occupational or Physical
Therapist, Licensed Occupational or
Physical Therapy assistants, (Interested
Physicians, Speech Pathologists, RNs and
Recreational Therapists please contact the
sponsor for other courses or special
permission for attending parts or all of this
course.)

Course Description:

This 98 Hour certification course is
specifically designed for occupational
and physical therapists who work with
adults with hemiplegia from a stroke or
brain injury. The main emphasis in this
course is on assessment and
management in functional activities to
develop excellence in maximizing
functional outcomes throughout the
continuum of care. This course utilizes
an integrative whole person approach
with emphasis on restoring function and
making it functional for a return to
independent living and the resumption /
assumption of life roles. Challenges
encountered by therapists in meeting
their patient's needs throughout the
continuum of care, are addressed
throughout the course. The course
consists of lecture, laboratory practice,
demonstrations and patient treatment.
Individual attention by the instructors will
be provided to enhance participant's
observation, handling and problem
solving skills. This course includes the
practical application of current basic to
advanced concepts sequenced in a
creative manner to help all participants
meet the course objectives as well as
their individual objectives. Upon
successful completion of the course,
participants will be
Neuro-IFRAH Certified®.

Please Circulate to Physical and Occupational Therapy Departments
For Sponsoring Introductory, Intermediate, Certification or Advanced Courses
In your area, please call (858) 550-1455 or fax to (858) 550-5977

Course Objectives:

1. Identify the impact of the stroke / brain injury on the patient's life roles and the functional limitations interfering with his/her ability to resume / assume those roles.
2. Identify the primary & secondary impairments (movement & otherwise) underlying the functional limitations in various postures including function in upright posture.
3. Select functional activities that will assess the patient's functional limitations and underlying impairments in various postures including function in upright posture.
4. Identify concepts related to musculoskeletal biomechanics and function of the trunk, upper extremities, lower extremities, head/neck and overall body coordination.
5. Differentiate between normal and abnormal movement throughout the body in various postures and transitions in functional activities including activities in upright posture.
6. Identify concepts related to the impact of whole body alignment and control, as well as other mobility and control variables on respiration.
7. Identify missing components/processes necessary for interaction with the environment, effective learning and generalization of skills / carry over.
8. Develop a comprehensive treatment plan that will include preparation of mobility and control and facilitation of normal movement during functional activities in all postures, and ideas for carry over.
9. Develop strategies to facilitate the patients, increase awareness of the rehab process, improved self image and confidence, adaptation and planning / pacing skills.
10. Apply management strategies to help patients obtain missing components of movement throughout the body that are interfering with functioning at a higher level in all postures including function in upright posture.
11. Modify management strategies effectively based on the patient's response to maximize use of more normal and efficient movement patterns in functional activities.
12. Integrate concepts related to normal movement, musculoskeletal biomechanics and function, sensory, cognitive, communicative, perceptual motor and emotional considerations into activities of daily living and other functional activities.

Application Neuro-IFRAH® Certification Course

Part I Dates: _____

Part II Dates: _____

Name: _____

Profession: _____

Mailing Address: _____

City: _____ State: _____

Zip code: _____

Phone: _____
