NEURO-IFRAH ORGANIZATION APPROVED ADVANCE COURSE:

ADVANCED GAIT Course Description:

This five day Neuro-IFRAH® Organization approved advanced course is designed for physical and occupational therapists and physical and occupational therapy assistants who have successfully completed the Neuro-IFRAH® Certification course. This course will cover concepts from the well rounded whole person and functional Neuro-IFRAH®

model for normal gait. Participants will be provided with practical applications and step by step instructions for the reacquisition of skills that are essential for normal gait. This course is authored and designed by Waleed Al-Oboudi who is renowned for his superior and unmatched visionary concepts and highly effective and creative techniques.

This course promises to increase clinician's assessment and management skills as well as introducing concepts that will be unmatched in expanding participant's perspective of normal gait.

This course is designed to provide several patient treatment labs to give participants an opportunity to work with patients on a variety of skills.

OBJECTIVES:

Upon completion of the course, participants will be able to:

- 1. Identify Neuro-IFRAH® concepts related to normal gait.
- 2. Identify concepts related to developing an effective well rounded gait assessment.
- 3. Identify missing components interfering with normal gait on a patient.
- Develop an effective treatment plan on an actual patient to restore identified missing components interfering with normal gait.
- 5. Demonstrate effective application of management strategies learned to resolve patient's impairments and improve the function of gait.
- 6. Modify treatment strategies.
- Demonstrate effective use of tools to grade and enhance effectiveness of results.
- 8. Integrate concepts related to whole person function, walking, the environment, and adaptation.

Program Faculty:

WALEED AL-OBOUDI, MOT. OTR

is a therapist and educator in the field of rehabilitation nationally and internationally for over 40 years. He is the originator of the Neuro-IFRAH® approach and is known for his concepts and clinical skills in the treatment and management of patients affected by a stroke or brain injury. Many of his basic to advanced concepts are copied as he was the mentor of a number of known educators for many years. He is the originator of all his intermediate to advanced concepts and applications. He is also the originator of the IFRAH® concepts and applications for patients affected by orthopedic conditions. Mr. Al-Oboudi's Neuro-IFRAH® approach includes a whole system of hands on therapy, training equipment, and orthotics that are taught by Neuro-IFRAH® Instructors at top facilities and are popular and effective courses nationally and internationally. Mr. Al-Oboudi's concepts and clinical skills are self evident and aim to set a standard of excellence in rehabilitation as they have been continuously demonstrated in live national conferences, courses,

and teleconferences for over 35 years.

ADVANCED FUNCTION IN UPRGHT POSTURES

(WITH EMPHASIS ON DEVELOPING DYNAMIC FUNCTIONAL MOBILITY AND CONTROL IN UPRIGHT POSTURES AND WHOLE BODY COORDINATION WITH OTHER SYSTEMS). *Enrollment limited to 24 participants.*

Course Description:

This 5-day Course designed for therapists who work with adult stroke or brain injury patients. As a prerequisite for attending this course, participants must have completed a Neuro-IFRAH® Certification course.

This course consists of lecture and lab sessions. The lab session will focus on the development of advanced patient handling skill through working with other patients and actual patient treatment by patients.

Patient demonstration and individual attention by the instructors to participants during patient treatment sessions will be provided to enhance the participants handling and problem solving skills. This 5-day course promises to broaden the participant's knowledge base and enhance patient handling skills beyond the 3-week courses and certification course information. This course covers practical, applicable and creative strategies highly recommended by advanced clinicians and well known physical and occupational therapy instructors. This course meets one week of 6-week requirement for the Neuro-IFRAH Specialist® Program.

COURSE LEARNING OBJECTIVES:

Upon completion of this course, participants will be able to:
1. Identify concepts related to facilitation of upper extremity
and lower extremity use/function and whole body use for
support, manipulation, balance, expression, sensory and
functional tools, emotional release, comfort, containment,
protection, and propulsion.

protection, and propulsion.

Demonstrate effective application of handling concepts in developing upper extremity and lower extremity use/function and whole body use for support, manipulation, balance, expression, sensory and functional tools, emotional release, comfort, containment, protection, and propulsion

propulsion.

3. Identify concepts related to the restoration of automaticity throughout the whole body, and carryover in functional use during activities of daily living and other functional activities.

 Identify the missing components of movement that are interfering with patient's ability to function at higher levels in upright postures.

 Apply handling concepts/techniques to help attain the missing components of movement that are interfering with functioning at higher levels in upright postures.

 Develop strategies to encourage generalization of skill and carryover.

 Develop strategies to coordinate gained movement with the whole body and other systems and encourage positive effects on body image self-image, and confidence.
