ADVANCED UPPER EXTREMITY COURSE

Course Description:

This 5-day Course is specifically designed for therapists working with adult stroke patients. As a prerequisite to attending this course, participants must have completed a Neuro-Dynamic Therapy Certification course or a NEURO-IFRAH® certification course.

This course consists for lecture and intensive lab sessions. Lab sessions will focus on development of advanced patients handling skills through working with other participants and actual patient treatment by participants. Lecture and Lab session are complemented by visual aids demonstrating the application of concepts and techniques provided in a clinical setting. Patient demonstration and individual attention by the instructor to participants during patient treatment session will be provided to enhance the participants handling and problem solving skills. This course meets one week of 6-weeks requirement for the NEURO-IFRAH Specialist® program.

OBJECTIVES:

Upon completion of the course, participants will be able to:

- Identify the Neuro-IFRAH® Approach Framework and handling guidelines as related to facilitation of upper extremity function.
- Identify concepts related to facilitation of fine motor skills improving hand alignment and decreasing or preventing hand impairments and functional limitations.
- Identify concepts related facilitation of upper extremity use/function for support, manipulation, balance, expressions, sensory and functional tools, emotional release, comfort, containment, protection and propulsion.
- Identify concepts related to facilitation of upper extremity control in the development of reach in all directions improving shoulder alignment and decreasing or preventing shoulder impairments and functional limitations.
- Demonstrate effective application of handling techniques in realignment of the scapula and facilitation of scapula control in coordination with trunk and upper extremity movements.
- Apply handling techniques to facilitate upper extremity function in coordination with the whole body.
- Apply handling technique to facilitate upper extremity function in control of posture, transitional movement, and functional activities in postures.
- Identify concepts related to the restoration of upper extremity automaticity and carryover in functional use during ADL's and other functional activities.

Faculty:

WALEED AL-BOUDI, MOT, OTR, is a therapist and educator in the field of rehabilitation nationally and internationally for over 40 years. He is the originator of the Neuro-IFRAH® approach and is known for his concepts and clinical skills in the treatment and management of patients affected by a stroke or brain injury. Many of his basic to advanced concepts are copied as he was the mentor of a number of known educators for many years. He is the originator of all his intermediate to advanced concepts and applications. He is also the originator of the IFRAH® concepts and applications for patients affected by orthopedic conditions. Mr. Al-Oboudi's Neuro-IFRAH® approach includes a whole system of hands on therapy, training equipment, and orthotics that are taught by Neuro-IFRAH® Instructors at top facilities and are popular and effective courses nationally and internationally. Mr. Al-Oboudi's concepts and clinical skills are self evident and aim to set a standard of excellence in rehabilitation as they have been continuously demonstrated in live national conferences, courses, and teleconferences for over 35 years.

ADVANCED HAND FUNCTION/FINE MOTOR

Course Description:

This 5-day Course is specifically designed for therapists working with adult stroke patients. As a prerequisite to attending this course, participants must have completed a Neuro-Dynamic Therapy Certification course or a NEURO-IFRAH® certification course.

This course consists for lecture and intensive lab sessions. Lab sessions will focus on development of advanced patients handling skills through working with other participants and actual patient treatment by participants. Lecture and Lab session are complemented by visual aids demonstrating the application of concepts and techniques provided in a clinical setting. Patient demonstration and individual attention by the instructor to participants during patient treatment session will be provided to enhance the participants handling and problem solving skills. This course meets one week of 4-weeks requirement for the NEURO-IFRAH Specialist® program.

OBJECTIVES:

Upon completion of the course, participants will be able to:

- ▣ Identify normal movement components of of upper extremities specifically the hand.
- ▣ Discuss biomechanics of the upper extremity with an emphasis on the hand.
Analyze typical patterns of the hand that interfere with function.
- ▣ Discuss the development and effect of hand function as related to proximal control.
Demonstrate appropriate treatment strategies during treatment practicum.
- ▣ Synthesize information to develop appropriate treatment strategies for persons with neurological dysfunction.
- ▣ Identify concepts related to characteristics of hand use/ function, facilitation of hand function/fine motor skills, improving hand alignment and decreasing or preventing hand impairments and functional limitations.
- ▣ Apply handling techniques to facilitate hand function in coordination with the whole body.
- ▣ Apply handling techniques to improve hand alignment and mobility and facilitate hand function/ fine motor control in coordination with the whole body in functional conditions....
- ▣ Identify concepts related to the restoration of upper extremity automaticity and carryover in functional use during ADL's and other functional activities.
